# Development Game Plan

Focus on coding

**Install Node and Yarn**

**Install Angular CLI**

**Generate a new Angular app**

**Setup a proxy**

**Add a service and component**

# Angular Project and Deployment Options

**Embed and serve  
Angular code from  
Spring Boot**

**Create Angular as  
a stand-alone app  
and proxy to Spring Boot**

# Summary

**Installed JS tooling**

**Created new app with Angular CLI (ng)**

**Angular deployment options and proxies**

**Created an Angular service**

**Created an Angular component**

**Setup the Angular router**
